

## Anatomic Pathologist (m/f/d) – fluent in Spanish

Antech is a leader in veterinary diagnostics, driven by our passion for innovation that delivers better animal health outcomes. Our products and services span 90+ reference laboratories around the globe; in-house diagnostic laboratory instruments and consumables, including rapid assay diagnostic products and digital cytology services; local and cloud-based data services; practice information management software and related software and support; veterinary imaging and technology; veterinary professional education and training; and board-certified specialist support services.

We are currently looking to hire an Anatomic Pathologist (m/f/d), on a part-time basis, remote in Europe. In this role, you will diagnose disease in companion, large, and laboratory animals by examining body tissues, interpreting biopsies and cytological smears and generate accurate reports in a timely manner, making clinicopathologic correlations useful to clinicians.

### Main responsibilities:

- Produce pathology (histopathologic and cytologic) reports according to current Antech best practices including microscopic description, microscopic findings, comments, and citing references when appropriate.
- Finalized or preliminary reports will be released in a prescribed format (i.e. narrative or synoptic report, Antech Oncopathology Advisory Panel case summaries) in compliance with the deadlines required by the service (exceptions will be made on an individual basis).
- Achieve reading 50% of case load by 3 months from start date.
- Consult with colleagues, clients, Antech associates, and other medical/ scientific professionals via phone, email, digital pathology software, and Internet-based video conferencing.
- Participate in Antech Anatomic Pathology conferences, seminars, and rounds using Internet-based video conferencing.
- Assist lab personnel in conjunction with specimen processing as needed.
- Participate in digital pathology consultations with other Antech pathologists.
- Engage in continuing education to stay current on new knowledge, methods, and standards as pertains to diagnostic veterinary pathology.
- Participate in internal Quality Control procedures.
- Contribute to the training of veterinary students, interns, and residents as interest and time allow.
- Complete other duties as assigned, relevant to Anatomic Pathology, Antech, and Mars Veterinary Health.

### Your Profile:

- Doctor of Veterinary Medicine (DVM/VMD) degree or equivalent.
- Board certification or eligibility for board certification by the American College of Veterinary Pathologists (ACVP) or European College of Veterinary Pathologists (ECVP) required.

# Antech

Smarter Diagnostics. Better Care.™
